### DETAILED ACTION

1. Applicant's response filed on 11/28/2005 has been considered. The previous rejection has been withdrawn in view of Applicant's submission of Terminal Disclaimer.
2. Claims 21 and 22 are canceled and claims 1-20 are pending.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishimaru et al. (US 6,610,389 B2).

Ishimaru discloses an ink jet recording medium comprising a support and an ink receptive layer on the support, wherein the ink receptive layer comprises fumed silica having a primary particle size of 3-30 nm (claims 1 and 2). The ink receptive layer is equivalent to the claimed colorant receiving layer. The support comprises a paper and a resin coated on the paper (col. 6, line 66). The paper is equivalent to the claimed substrate and the resin layer is equivalent to the claimed protective layer. The recording medium further comprises a primer layer under the ink receptive layer (col. 14, line 53). The primer layer is equivalent to the claimed undercoat layer. Pigment ink is printed on the recording medium (col. 4, line 15). With respect to claims 1-4 and 13-16, it would have been an obvious matter of design choice to vary the coating size or

area of the ink receptive layer and/or the primer layer, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art.
